MEET OUR GREAT TEAM !

Lili Wu

MCI

I'm proficient in bug-detecting, based on the functions required and some critical components. Always try my best to hand over the highest quality of our product.

Liang Yuan

MCI

Have experience in Web project as intern. I'm interested in programming. This project is a good chance to be familiar with software engineering.

Yi Lin

MCI

I am interested in programing, and willing to work together with other members. Hoping from this project I can improve my coding skill and cooperation experience.

Zeqi Fu

MSE

Java/Python Developer. Research field of data mining, large-scale social network analysis, social computing.
--"Life is a challenge, Don't miss out."

Yann Frizenschaf

CS

Full-stack software developer, has experience in full-stack Java and Android application development, and is also proficient in C# and Python. Avid soccer fan and player.

Navdeep Singh

MCI

I'm interested in exploring career opportunities in Computers, specifically in Software development. I was involved in the Attendance taking web application Project, which will be used by The University of Adelaide to take Tutorial Attendance. I am currently working in a team for a Software engineering Project and I really enjoy working being in a team environment. I have done Programming in C++, PHP, Java, Hardware Description Language (HDL), Jack, and happy to Learn more.

Tao Zhang

MCI

I completed a Bachelor of Journalism and transferred to MCI due to my interest in the fast-moving world of computers. Not a lot of experience but looking forward to develop awesome softwares.
